

Are you an Autistic Adult with Intellectual Disability?

OR do you provide support for such an individual?

We need your help!

We are conducting a research study

We want to know what life is like for people with autism as they get older. We need more people with intellectual disability to be part of study. We need both people with autism and people without autism in the study.

We want to know about:

- Your health
- How you feel
- What you do
- Your sleep
- What services you use

We hope this study will help to make better services and supports for adults with Autism in the future.

What would I have to do?

- Answer questions on paper or on the computer OR let your family, friend or support person answer questions for you
- Complete more questions about yourself two years later, if you want to.

How long would it take?

- It might take 2 or 3 hours or more to finish, but does not have to be done all at once.

Can I change my mind?

- Yes! It is your choice to be part of this study and you can stop at anytime

How can I be in the study?

Who:

Phone:

Email:

Jane, Sam or Julian
